RELEASE HIGHLIGHTS

FlowScout PON Optical Power Meter

AFL's FlowScout PON Power Meter identifies, measures, and qualifies both downstream and upstream signal levels in FTTx PON networks. It is perfect for technicians responsible for activating and maintaining networks carrying a mix of GPON/EPON, video, and next gen PON (XG/XGS-PON, 10GEPON) wavelengths.

Unlike competing through-mode PON Power Meters, AFL's FlowScout requires no setup. Technicians simply plug in the fiber under test to see results displayed in seconds on the large color touchscreen. Storage and reporting options are included to verify and document results from the field.

FlowScout's rugged design makes it perfect for outside plant environments where it can be dropped, get dirty or even wet. And because it is so easy to use, FlowScout requires little, if any, training.

See ["FlowScout PON Optical Power Meter" on page 48.](#)

VFI4 Visual Fault Identifier

AFL's compact VFI4 injects high-powered red-laser light to provide exceptional brightness and range for locating defects in single-mode and multimode fibers.

During installation and activation, the VFI4 is used for quick continuity checks, fiber tracing, splice verification, and Pass/Fail validation for mechanical connectors.

The VFI4 is also an essential troubleshooting tool to find sharp bends, breaks, faulty connectors, and other defects that "leak" light - enabling technicians to quickly spot them.

See section ["VFI4 Visual Fault Identifier" on page 58.](#)

FlexScan FS300 Quad OTDR

Easily Locate and Resolve Optical Network Faults

Award-winning all-in-one solution that automates test setup, shortens test time and simplifies results interpretation.

Specifications

- Wavelengths: MM 850/1300, SM 1310/1550
- Network Type: Point-to-Point and PON up to 1:64
- Dynamic Range: MM $\geq 29/29$ dB, SM $\geq 37/36$ dB
- Event Dead Zone: ≤ 0.8 m
- Range Settings: MM 250 m to 30 km, SM 250 m to 240 km
- Data Points: Up to 300,000
- Internal Storage: 4 GB ($\geq 1,000$ traces)

The FlexScan FS300 OTDR enables both expert and novice technicians to quickly and accurately locate, identify and measure components and faults on either single-mode or multimode optical networks.

The pocket-sized FlexScan FS300 includes an integrated optical light source, power meter and visual fault locator (VFL). It can be easily coupled with AFL's award-winning FOCIS inspection probes or optical fiber identifiers (OFI) to give technicians everything they need to locate and resolve any optical network issues.

FlexScan SmartAuto tests utilize multi-pulse acquisition to obtain high-resolution without sacrificing measurement range. Test results are clearly displayed on the large 5-inch touchscreen with color-coded LinkMap[®] icons providing network configuration and pass/fail status at a glance.

Professional reports can be generated using either integrated Print-to-PDF or the included Windows-compatible TRM[®] 3.0 Test Results Manager software. Results can be transferred from FlexScan by USB cable or wirelessly using the free FlexScan App.

FLEXSCAN® OTDRS

FS300 Quad OTDR with SmartAuto® and LinkMap®

All the benefits of FlexScan **PLUS**...

- Quad OTDR (850/1300 multimode and 1310/1550 single-mode, including FTTH PON test)
- Larger, higher resolution display (5", 800 x 480)
- Gesture-recognition touchscreen (swipe-to-pan, pinch-to-zoom)
- Integrated Print-to-PDF
- Auto-save and auto-send
- User-replaceable, longer life battery

FlexScan FS300 models are available in six kit configurations: Basic, PLUS, PRO, BIPM, SMPO, and MMPO.

- All kits include FS300 with AC charger, battery, carry strap, SC/2.5 mm connector adapters, TRM® 3.0, quick reference user guide, and carry case
- PLUS kits add 150 m fiber rings and One-Click Cleaner
- PRO kits additionally include a FOCIS Flex auto-focusing connector inspection probe with IEC pass/fail analysis and two adapter tips
- BIPM kits expand on PRO Kits by adding a bend-insensitive fiber identifier with optical power meter
- SMPO kits include FS300, single-mode MFS Switch, single-mode 150 m fiber ring (SC/APC to SC/APC), single-mode MPO launch cable (unpinned) to user-selected male (pinned) or female (unpinned) MPO connector, TRM 3.0 Advanced, One-Click Cleaners (single-fiber and MPO), carry case that allows FlexScan, MFS Switch, and fiber rings to be connected, operated in the carry case and remain configured during transport
- MMPO kits include FS300, multimode MFS Switch, OM3/4/5-compatible 150 m fiber ring (SC to SC), multimode MPO launch cable (unpinned) to user-selected male (pinned) or female (unpinned) MPO connector, TRM 3.0 Advanced, One-Click Cleaners (single fiber and MPO), carry case that allows FlexScan, MFS Switch, and fiber rings to be connected, operated in the carry case and remain configured during transport

FlexScans equipped with Bluetooth option (W1) support Bluetooth transfer of results via iOS or Android FlexScan App for remote reporting using TRM 3.0. The FlexScan App is available as a free download from 'iOS App Store' or 'Google play' store.

- b. FlexScans equipped with Bluetooth option (W1) support Bluetooth transfer of results via FlexScan App for remote reporting using TRM 3.0.
- c. Basic kit always ships with S1 (Standard Soft Case); MPO kit always ships with MPO-specific soft case.

FlexScan[®] FS200

Award Winning Pocket-Sized Singlemode OTDR

Measure fiber attenuation and identify connectors, splices, cable ends & issues such as bends or breaks

Specifications

- Wavelengths: Single, dual, triple (1310, 1550, 1650 nm)
- Network Type: Point-to-Point and/or FTTH PON
- Dynamic Range: Up to 37 dB
- Internal Storage: 4 GB (>1000 traces)
- Size: 86 x 160 x 43 mm; Weight: 0.4 kg
- Battery Life: >12 hours, Telcordia test conditions
- Display: Color touchscreen 4.3 in LCD
- Available with field-replaceable Port Saver
- USB, Bluetooth, and Wi-Fi interfaces

The FlexScan FS200 is a family of performance-packed singlemode OTDRs which provide fast, accurate fiber characterization and fault location for point-to-point and FTTH PON networks.

FlexScan FS200 OTDRs automate test setup, simplify results interpretation, and shorten test time, all at an affordable price point. AFL's SmartAuto[®] mode requires just the push of a button to test the network. Results are clearly displayed on the large touchscreen using color-coded LinkMap[®] icons that show network configuration and pass/fail status at a glance. Our new Flexpress[®] mode completes dual-wavelength tests in under 5 seconds – 10 x faster than other OTDRs!

The integrated light source, power meter and VFL, along with an optional connector inspection scope, provide both expert and novice technicians everything they need to locate and resolve optical network issues. Results may be stored internally or externally and easily shared via USB or Bluetooth. Included Windows-compatible TRM[®] 3.0 Test Results Manager software quickly generates easy-to-understand reports. The results used for TRM reports can be transferred from FlexScan by USB cable or wirelessly via the FlexScan App.

FlexScan OTDR

FlexScan Basic Kit

FlexScan Plus Kit

FlexScan PRO Kit

FlexScan MPO Kit

FS200 SMF OTDR with SmartAuto®, FleXpress® and LinkMap®

FleXpress Free Upgrade Introductory Offer

Combining SmartAuto network-optimized event detection and analysis with its intuitive LinkMap view of the tested network, AFL's FlexScan OTDRs enable even novice technicians to quickly and easily troubleshoot or fully characterize optical fiber networks. Have dozens of fibers to test? Reduce test time more than 10x, completing dual-wavelength OTDR tests in <5 seconds using new FleXpress fast test! For even faster testing, use FlexScan's new integrated MPO switch control to automate multi-fiber testing.

FlexScans equipped with Bluetooth option (W1) support Bluetooth transfer of results via iOS or Android FlexScan App for remote reporting using TRM® 3.0. The FlexScan App is available as a free download from 'iOS App Store' or 'Google play' store.

FlexScan FS200 family offers the following models with integrated VFL, two USB ports plus optional source, power meter, Bluetooth® and Wi-Fi communications:

- **FS200-50B:** 1550 nm Point-to-Point Troubleshooting OTDR
- **FS200-60:** 1650 nm Live PON Troubleshooting OTDR
- **FS200-100:** 1310/1550 Point-to-Point Verification and Troubleshooting OTDR
- **FS200-300:** 1310/1550 PON and Point-to-Point Verification and Troubleshooting OTDR with FleXpress and MPO Switch control
- **FS200-303:** 1310/1550/1625 PON and Point-to-Point Verification and Troubleshooting OTDR with FleXpress and MPO Switch control
- **FS200-304:** 1310/1550/1650 PON and Point-to-Point Verification and Troubleshooting OTDR with FleXpress and MPO Switch control

[MOD]	FS200 FlexScan OTDR Configuration
50	1550 nm only Troubleshooting OTDR
60	1650 nm only Live PON Troubleshooting OTDR
100	1310/1550 nm Verification and Troubleshooting OTDR
300	1310/1550 Pt-to-Pt and PON Verification and Troubleshooting OTDR
303	1310/1550/1625 Pt-to-Pt and PON Verification and Troubleshooting OTDR
304	1310/1550/1650 Pt-to-Pt and PON Verification and Troubleshooting OTDR

[KIT]	FS200 FlexScan Kit Configuration / Kit Contents
BAS	Includes: FS200, TRM 3.0 Basic, USB cable ^a , soft case
PLUS	Includes: BAS kit plus 150 m SMF Fiber Rings, One-Click Cleaner, upgrade to TRM 3.0 Advanced, soft or hard carry case
PRO	Includes: PLUS kit plus FOCIS Flex with two user-selected adapter tips
FTTH-PRO	Includes: BAS kit plus 150 m SC/APC and LC/APC SMF Fiber Rings, SC & LC One-Click Cleaners, Port Saver, TRM 3.0 Advanced, soft or hard carry case (FS200-303/304 only)
BIPM	Includes: PRO kit plus OFI-BIPMe
MPO	Includes FlexScan, MFS Switch, MPO launch cable, OTDR-to-Switch launch cable, OTDR-to-Switch USB cable

[PW]	Power Meter / Wireless Option
P0-W0	No Source, Power Meter, or Bluetooth/Wi-Fi (-50B/60/100 only)
P0-W1 ^b	No Source, Power Meter; Includes Bluetooth/Wi-Fi (FS200-300/304)
P1-W0	No Bluetooth/Wi-Fi (FS200-303/304 only); Includes Source, Power Meter
P1-W1 ^b	Includes Source, Power Meter, Bluetooth/Wi-Fi (all models except -50B)

[C]	OTDR / Source Connector Type
A	APC (recommended)
U	UPC

[CC] ^c	Carry Case Option (PLUS, PRO, FTTH-PRO, BIPM Kits)
S1	Large soft case for FS200, Fiber Ring, FOCIS Flex, OFI-BIPMe, accessories
S2	Medium soft case for FS200, Fiber Ring, FOCIS Flex, accessories
H1	Hard carry case for FS200, Fiber Ring, FOCIS Flex, OFI-BIPMe, accessories

M	Female (unpinned) to Male (pinned)

Notes:

- Results can be transferred from FlexScan OTDR to TRM® 3.0 using USB cable, or performed wirelessly (W1 option) after downloading free FlexScan App. The FlexScan App is available as a free download from 'Google play' or 'App Store'.
- FlexScans equipped with Bluetooth option (W1) support Bluetooth transfer of results via FlexScan App for remote reporting using TRM 3.0.
- Basic kit always ships with S2 (Medium Soft Case); MPO kit always ships with MPO-specific soft case.

FlexScan® TS100

One-Touch FTTH PON Troubleshooter

Avoid extended downtime and additional truckrolls with the easy-to-use TS100 designed for frontline technicians

Specifications

- Wavelengths: 1650 nm filtered live PON Troubleshooter
- Network Type: Point-to-Point and/or FTTH PON
- Integrated GPON/10GPON PON Power Meter
- Test Range: Up to 40 km
- Test Time: Length, Loss, ORL, faults to end or Splitter ≤ 3 sec
- Results Storage: 4 GB internal memory
- Size: 86 x 160 x 43 mm and weighs 0.4 kg
- Battery Life: >12 hours, Telcordia test conditions
- Display: 4.3 inch color touchscreen LCD
- Available with field-replaceable Port Saver

AFL's FlexScan TS100 is a family of pocket-sized optical troubleshooters for frontline service technicians to enable them to quickly verify or diagnose GPON, video and XG/XGS-PON or 10GEPON networks.

It features automated setup, ultra-fast fault location, and color-coded icons that enable even novices to diagnose and repair single-mode networks like experts.

TS100 measures downstream PON power, link length, loss, and ORL in under three seconds with the push of a button. Technicians then simply touch any failed measurements to get information on what to do about it.

Test results may be stored internally or externally and easily shared via USB or Bluetooth. The included Windows-compatible TRM® 3.0 Test Results Manager software quickly generates easy-to-understand reports.

Service providers, MSOs, and contractors love FlexScan TS100 because it automates testing, shortens test time, interprets results, and recommends corrective actions - improving the efficiency of their frontline technicians and reducing costs.

FlexScan® TS100 FTTH PON Troubleshooter

AFL's FlexScan TS100 Optical Troubleshooter is an easy-to-use, all-in-one tool for detecting, identifying, locating, and resolving single-mode optical network issues. The TS100 provides auto-configured settings to quickly measure received power, link length, loss, ORL and detect events with the push of a button. Results are displayed within seconds using color-coded LinkMap® icons for easy analysis. The FlexScan TS100 automates testing, shortens test time, interprets results, and recommends corrective actions, improving efficiency of frontline technicians and reducing costs.

Higher performance TS100-70 FlexScans can test through splitters up to 1:64, measure splitter loss and compare it to user-settable min/max loss limits, enabling technicians to detect dirty or damaged connections or macro-bends at the splitter.

The lower cost FlexScan TS100-60 will test to the splitter but not through the splitter. Consequently, it will not detect and report macro-bends or poor connections at the splitter which cause excess loss through the splitter.

TS100s are available with a field-replaceable connector, which accepts tool-free, interchangeable connector adapters. Users are able to replace the connector in the field if damaged when mating dirty or damaged connectors to the TS100. The field-replaceable connector also allows users to convert the Troubleshooter port from APC to UPC or vice versa.

All TS100s include an integrated Light Source, user-selected Broadband or optional Dual-wavelength Power Meter, Visual Fault Locator (VFL), USB and optional Bluetooth interfaces. The Light Source generates CW, Wave ID and fiber-identifying tones, while the Power Meter automatically detects Wave ID and tones.

FlexScan TS100 Kit Configuration - [KIT]

All kits include selected FlexScan TS100 with AC charger, battery, carry strap, SC/2.5 mm connector adapters, TRM® 3.0, USB cable, and soft carry case. PLUS kits add a 150 m Fiber Ring, One-Click cleaner, and upgrade to TRM 3.0 Advanced software. PRO kits add a FOCIS® Flex auto-focusing connector inspection probe with IEC pass/fail analysis and two adapter tips. TS100s are manufactured with APC connectors.

[KIT]	TS100 Kit Configuration/Kit Contents
BAS	Includes: TS100, soft case, TRM 3.0 Basic, USB cable*
PLUS	Includes: BAS kit plus 150 m Fiber Ring, One-Click Cleaner, upgrade to TRM 3.0 Advanced
PRO	Includes: PLUS kit plus FOCIS Flex with 2 adapter tips

Notes:

- a. Results can be transferred from FlexScan to TRM 3.0 using USB cable, or uploaded via Bluetooth using IOS or Android FlexScan App downloaded from 'IOS App Store' or 'Google play' store.

Optical Ferrule Port Saver

Field-Replaceable OTDR Connector

Tired of expensive and time-consuming OTDR connector replacement? — Port Saver prevents ferrule damage and reduces equipment downtime!

Features

- Prevents damage to factory-installed OTDR ferrules
- Allows damaged connectors to be replaced in the field
- Supports APC and UPC ferrules and connectors

AFL's new Port Saver is a field-replaceable connector that protects FlexScan®-series OTDR's ferrule from damage due to repeated mating.

Protect your OTDR ports from damage due to mating with dirty or damaged launch cables or patch cords or normal wear-and-tear. Equip your FlexScan FS200 or FS300 OTDR or TS100 Troubleshooter with a field-replaceable connector which installs in seconds and accepts AFL's tool-free interchangeable SC, LC, FC and ST connector adapters.

Replace damaged connectors in the field: When normal wear-and-tear or poor cleaning practices damage the port saver's end-face, replace it in seconds without having to return the OTDR to a service center for an expensive and time-consuming repair.

Contact your local AFL representative to learn more about the Field-Replaceable OTDR Connector.

MFS- Multi-Fiber Switch

MFS Multi-Fiber Switch OTDR Add-on Kit

Single-mode and multimode Multi-Fiber Switches (MFS) are available to accelerate OTDR testing of MPO-connectorized, multi-fiber cables. OTDR MFS Add-on Kits include (1) MFS with MPO connector, (1) single-fiber Fiber Ring to connect OTDR to the switch, plus (1) MPO Fiber Ring. Select single-mode or multimode. See section "Multi-Fiber Switch Models" on page 46 for MFS details.

AFL NO.	Contains (ea.)		
	12F MFS Switch	Fiber Ring	MPO Fiber Ring
MPO-SM-OTDR-ADD	MFS-12-SM-ASC, SM, SC/APC-MPO/APC pinned	SM, 150 m, SC-ASC or ASC-ASC (depending on OTDR connector)	12F, 61 m, MPO/APC-unpinned to MPO; Select pinned or unpinned network MPO connector
MPO-MM-OTDR-ADD	MFS-12-MM-USC, MM, SC/UPC-MPO/UPC pinned	OM3/4/5-compatible, SC-SC, 150 m	12F, 61 m, MPO-unpinned to MPO; Select pinned or unpinned network MPO connector

MFS Multi-Fiber Switch OTDR Add-on Kit Order Entry

Multimode OTDR Add-on Kit: MPO-MM-OTDR-ADD-[FRM] where:

[FRM] = multimode MPO fiber ring to connect MPO switch to multimode network under test

UF/UM = MPO/UPC unpinned to MPO/UPC pinned, Type A polarity

UF/UF = MPO/UPC unpinned to MPO/UPC unpinned, Type A polarity

Note: Multimode Add-on Kit always includes: 150 m, OM4, SC/UPC to SC/UPC fiber ring to connect multimode OTDR to multimode switch.

Single-mode OTDR Add-on Kit: MPO-SM-OTDR-ADD-[FR]-[FRM] where:

[FR] = single-mode fiber ring to connect OTDR to MPO Switch; Options:

USC/ASC = SC/UPC to SC/APC for FlexScan OTDRs equipped with SC/UPC single-mode connector

ASC/ASC = SC/APC to SC/APC for FlexScan OTDRs equipped with SC/APC connector

[FRM] = single-mode MPO fiber ring to connect MPO Switch to single-mode network under test

AF/AM = MPO/APC unpinned to MPO/APC pinned, Type A polarity

AF/AF = MPO/APC unpinned to MPO/APC unpinned, Type A polarity

NS Bench Top Model

NSR Rack-mountable Model

Custom-Designed Network Simulators

AFL network simulators are custom-designed bench-top or rack mountable boxes intended to duplicate installed fiber optic networks. Network simulators may be ordered with customer-specified lengths of multimode or single-mode fiber. Events such as connections, fusion splices, and mechanical splices can be added at various points within the fiber to duplicate installed networks. A variety of changeable panel mounted connector types are available. The bench top models can accommodate up to 15 km of fiber and the rack mountable cases can hold up to 100 km of fiber.

FTTx PON Simulator Kit

FTTx PON Simulator Kits

The FTTx PON Simulator Kit is designed to simulate a wide variety of FTTx PON architectures. It is field-configurable to implement both single splitter and distributed splitter PONs.

This field-portable kit may be used for lab or table-top FTTx PON demonstration, evaluation, and testing applications. The FTTx PON Simulator Kit is designed for a variety of users and applications, including network designers, fiber optic installation teams and trainers, equipment manufacturers, and sales engineers.

AFL NO.	Description
PONS-00-0901PZ	FTTx PON Simulator kit includes: (1) FTTx PON splitter box, (4) fiber rings, (3) SC/APC jumpers, (2) hybrid jumpers, (1) PON demo procedure, (1) carry case.

Fiber Ring

OTDR Launch and Receive/Tail Cords - Fiber Rings

To measure the insertion loss of the near-end and/or far-end connection of a fiber optic link, an OTDR requires a launch and/or receive/tail test cord, which essentially are test jumpers that can range from about 150 m to 1 km in length. AFL offers coiled lengths of 50 μ m and 62.5 μ m multimode, standard single-mode fiber (G.652) and bend-insensitive fiber (G.657), packaged in compact rings for use as OTDR test cords. Fiber Rings of 150 m of fiber are ideal for premises fiber network test applications. Fiber Rings of 500 m and 1 km of single-mode fiber are designed for broadband, long-haul fiber network test applications and FTTH applications when testing through a splitter.

Fiber Rings Part Number Order Entry

Single Fiber (SM or MM) Fiber Rings

AFL NO. = [FR]-[FFF]-[LLLL]-[CC1]-[CC2],
where:

[FR] = Fiber Ring (single fiber)

[FFF] = Fiber Type

SMF= Single-mode (G.652)

BIF = Bend Insensitive (G.657)

OM1 = 62.5 μ m multimode

OM2 = 50 μ m multimode

OM3 = 50 μ m laser optimized

OM4 = 50 μ m laser optimized

[LLLL] = Fiber Length (meters)

150 = 150 m (492 ft)

500 = 500 m (1640 ft)

1000 = 1000 m (3280 ft)

[CC1] = Connector Configuration OTDR end (see below)

[CC2] = Connector Configuration Network end (see below)

MPO-terminated Multi-Fiber (SM or MM) Fiber Rings

AFL NO. = [FRM1]-[FF]-[LLLL]-[P]-[MC1]-[MC2], where:

[FRM1] = MPO-terminated 12-fiber fiber ring

[FF] = Fiber Type

S2 = Standard single-mode (G.652)

M4 = OM4 50 μ m laser optimized

[LLLL] = Fiber Length (meters)

61 = 61 m (200 ft)

[P] = Polarity

A = Type A polarity (straight through, fiber 1 to fiber 1)

B = Type B polarity (fiber 1 to fiber 12)

[MC1], [MC2] = MPO Connector (OTDR end, Network end, respectively)

AF = APC, female (unpinned)

AM = APC, male (pinned)

UF = UPC, female (unpinned)

UM = UPC, male (pinned)

Notes:

- a. Contact AFL for special order fiber rings. Not all combinations of lengths and connectors are supported.
- b. Contact AFL for other special order configurations of MPO-terminated multi-fiber single-mode or multimode fiber rings.

FASTConnect®

FASTConnect® for Bare Fiber Termination

Suitable for either permanent connection or as a bare fiber termination for OTDR testing, AFL's FASTConnect connectors may be used to terminate single-mode or multimode fiber (OM1, OM2 or OM3/4-compatible) with SC, SC/APC, LC, or ST connectors. Termination requires simple, familiar strip, clean and cleave process. Index-matching gel provides for a low-loss, low reflectance connection. Each FASTConnect adapter may be reused up to 3 times.

FASTConnect Order Entry: FAST-[C]-[FT]-[Q] where:

[C]	Connector Type
SC	SC/UPC for 900 µm buffered fiber
ST	ST/UPC for 900 µm buffered fiber
LC	LC/UPC for 900 µm buffered fiber
SC48	SC/APC for 4.8 mm single-mode cable

[FT]	Fiber Type
MM50	50 µm OM2, UPC ferrule
MM50L	50 µm OM3/4-compatible, UPC ferrule
MM62.5	62.5 µm OM1, UPC ferrule
SM	Single-mode, UPC end
SMAU	Single-mode, APC ferrule with flat-cleaved fiber stub (SC48 only)

[Q]	Quantity
6	Package of 6
100	Package of 100

TJ-03 Temporary Splice

TJ-03 Temporary Splice

Only available to customers in North America!

The TJ-03 is a temporary mechanical fiber splice for fiber and cable connections to test equipment such as OTDRs or fiber optic cable reels. The TJ-03 uses a precision ceramic V-groove to align up to 12 fibers simultaneously. The fibers are prepared for joining by using standard mass fusion fiber preparation tools (fiber holders, hot jacket stripper, and cleaver.) Using the TJ-03 in conjunction with an OTDR equipped with an optical switch provides rapid one button optical tests of 12 fibers. **Note:** TJ-03 Temporary Splice and TJ-03 Temporary Splice Kit ship from the AFL Splicer Division in Spartanburg, SC.

AFL NO.	Description
S012772	TJ-03 Temporary Splice Kit includes: (1 pair) FH-50-12 fiber holders, CT-30 cleaver, HJS-02 hot jacket stripper, ADC-09 AC adapter for HJS-02, ACC-09 power cord
S010456	TJ-03 Temporary Splice (without fiber preparation tools)

FIBER INSPECTION & CLEANING

FOCIS Flex

Simple, Fast Fiber Optic Connector Inspection

Specifications

- Field of View (Live): 710 x 860 μm
- Field of View (Captured): Fully Zoomed In: 180 x 195 μm
- Display: 2.4", TFT, 240 x 320 with brightness control
- Pass/Fail Analysis: IEC 61300-3-35, IPC, user-defined
- File Format: 648 x 480 pixel JPG & GIF
- Storage Capacity: 10,000 images & results
- Battery: 8 hours, rechargeable NiMH

Research has shown that dirty and damaged connectors cause up to 85% of network failures. Taking less than 2 seconds to inspect each end-face is time well spent.

FOCIS Flex is an ultra-compact Fiber Optic Connector Inspection scope with liquid lens technology for fast auto-focus, centering and PASS/FAIL analysis. The integrated display eliminates awkward tethering and the small form factor makes inspection in tight places easier. The unit can store up to 10,000 images locally or easily share them via USB, WiFi and Bluetooth®.

FOCIS Flex offers a wide range of interchangeable adapter tips for both single-fiber and multi-fiber connectors. Available kits include TRM® 3.0, AFL's Test Results Manager software, to generate connector inspection reports including images and pass/fail results.

FOCIS Flex's self-contained compact design and fast one-button operation makes it a top choice of technicians installing and troubleshooting optical networks.

Contact sales@AFLglobal.com

FOCIS Flex

FlexScan® & FOCIS Flex

Sm. Device & FOCIS Flex

FOCIS Flex Fiber Optic Connector Inspection System

FOCIS Flex is self-contained fiber connector inspection probe. Its innovative, ultrafast auto-focusing system auto-centers, captures and analyzes the optical fiber end-face, displaying "Pass/Fail" results on the built-in screen in one push of a button. Results can be transferred wirelessly to smart devices or FlexScan® OTDRs. The FOCIS Flex offers built-in pass/fail analysis to updated IEC 61300-3-35, IPC, AT&T or user set criteria. The device can also be used for OptiTap and MTP/MPO inspections with AFL adapters. All FOCIS Flex kits include TRM® 3.0, Test Results Manager software to prepare and print or save connector inspection reports using results uploaded from the FOCIS Flex to a PC. Download the free FOCIS Flex App to archive results and prepare inspection reports using AFL's aeRos cloud-based workflow management software. Free FOCIS Flex App (iOS and Android) supports inspection reporting.

FOCIS Flex is available in a 'No Wireless' [NW] variant, which removes the Bluetooth and Wi-Fi functionality for use in RF restricted facilities.

FOCIS Flex Connector Inspection Kits

Each FOCIS Flex Kit includes: FOCIS Flex probe with wrist strap and dust cap, TRM 3.0 Basic Test Results Manager software, AC charger with country-specific plug, USB cable, quick reference guide, and soft carry case with strap.

FOCIS Lightning[®]

Ultrafast MPO/MTP[®] Multi-fiber Connector Inspection

FOCIS Lightning is a self-contained inspection probe that captures the entire MPO end-face image in less than two seconds from power-on. One button provides auto-focusing, centering and pass / fail analysis at the connector and individual fiber level. It can complete a 24-fiber MPO inspection task in less than 15 seconds. Results can be easily shared via USB, WiFi and Bluetooth[®].

FOCIS Lightning supports all MPO fiber configurations including Base-8 and Base-10 with key up/key down polarity capture. It can also be used for single-fiber inspection with optional coupler and tips. FOCIS Lightning recently won "Best in Show" at the 2019 BICSI Winter Conference & Exhibition and was rated "superb" by the 2019 Lightwave Innovation Reviews.

Specifications

- Field of View (Live): 1960 x 4670 μm
- Field of View (per fiber): 130 x 130 μm
- Display: 2.4" color LCD, 320 x 240, 3 zoom levels
- Pass/Fail Analysis: IEC 61300-3-35, IPC, user
- File Formats: 640 x 480 pixel JPG & GIF
- Storage Capacity: 10,000 images & results
- Battery: 8 hours, rechargeable NiMH

FOCIS Lightning focuses, captures and analyzes all fibers in the MPO/MPT end-face with a click of a button.

FOCIS Lightning

Smart Device Apps

FOCIS Lightning® Multi-Fiber Optic Connector Inspection System

FOCIS Lightning is an ultrafast MPO/MTP® connector inspection system with two high resolution image sensors to allow the instantaneous assessment of the full multi-fiber end face surface conditions, including a partial view of the connector pins or holes. IEC compliant auto-analysis can be completed 10 to 100 times faster than legacy mechanical scanning methods. FOCIS Lightning captures up/down key orientation, and supports all fiber configurations up to two rows with sixteen fibers per row. Individual fiber images, pass/fail auto analysis overlays, and zone table data are available for viewing on the integrated color LCD screen. Free FOCIS Flex App (iOS and Android) supports inspection reporting and provide a conduit to the aeRos® cloud-based workflow management platform.

FOCIS Lightning Connector Inspection Kits

Each FOCIS Lightning Kit includes: FOCIS Lightning probe with wrist strap and dust cap, AC charger with country-specific plug, USB cable, quick reference guide, and Easy Access carry case.

FOCIS Lightning is available in a 'No Wireless' [NW] variant, which removes the Bluetooth and Wi-Fi functionality for use in RF restricted facilities.

FOCIS Duel

FOCIS Duel® Fiber Optic Connector Inspection System

FOCIS Duel is an ultra-compact dual-port inspection scope for fiber optic connectors that uses liquid lens technology for fast auto-focus, centering and Pass/Fail analysis on two ports. This enables users to inspect both connectors in a mated connection without having to change adapter tips.

Free FOCIS Flex App (iOS and Android) provides a comprehensive and user-friendly feature set as well as connectivity with AFL's cloud-based aeRos® workflow automation platform.

FOCIS Duel Connector Inspection Kits

Each FOCIS Duel Kit includes: FOCIS Duel probe with wrist strap and dust cap, TRM® 3.0 Basic (Test Results Manager software), AC charger with country-specific plug, USB cable, quick reference guide, and soft carry case with strap.

FOCIS Duel is available in a 'No Wireless' [NW] variant, which removes the Bluetooth and Wi-Fi functionality for use in RF restricted facilities.

FOCIS WiFi2

FOCIS WiFi2™ Fiber Optic Connector Inspection System

FOCIS WiFi2 is an ergonomic Fiber Optic Connector Inspection System that, when paired with an iOS or Android smart device, provides fast and accurate IEC/IPC/AT&T compliant and user-defined pass/fail end-face cleanliness analysis. Free of charge iOS and Android companion apps support a comprehensive and user-friendly feature set.

Pass/Fail results in seconds: With the press of a single button, FOCIS WiFi2 auto-focuses, captures, centers and analyzes the end-face image to industry standard IEC 61300-3-35 (2015), IPC-8497-1, AT&T TP-76461 and user-defined criteria.

Untethered operation: App-based report generator with results/reports that can be shared by email. With rechargeable battery and convenient pass/fail LED feedback, FOCIS WiFi2 can be used autonomously.

Wide range of adapter tips: Interchangeable adapter tips support single and multi-fiber connector inspection for a wide range of patch cords and bulkhead-mounted connectors having either PC/UPC or APC polished end-faces compatible with all FOCIS Flex adapter tips.

FOCIS WiFi2 Connector Inspection Kits

Each FOCIS WiFi2 Kit includes: FOCIS WiFi2 probe with wrist strap and dust cap, AC charger with country-specific plug, quick reference guide, and soft carry case with strap.

FCC2 Enhanced Formula Fiber Connector Cleaner and Preparation Fluid

The FCC2 Enhanced Formula Fiber Optic Cleaning and Preparation Fluid is a non-flammable, environmentally safe, residue free solvent engineered to easily remove contaminants from fiber optic end-faces and bare fiber. The FCC2 is not hazardous and not regulated for all modes of transportation and shipping including air-cargo. For best results, use CCT cleaning sticks with FCC2 fluid!

FCC3-00-PEN1	Debris Destroyer™ - Fiber Optic Cleaning Pen (1 pen)	

CCT Connector Cleaning Tips

CCT Connector Cleaning Tips are molded cleaning tips that trap contamination and wick cleaning solvents away from connector end-faces. These tips use a molded, sintered polymer that is both porous and pliable, conforming to virtually any fiber end-face polish geometry while trapping and absorbing contaminants. CCT Tips are intended for cleaning the ferrule end-faces in adapters and sockets, as well as the exposed ferrules and termini of jumpers. Available in double-ended or single-ended design.

AFL NO.	Description	Tube Color	Sticks QTY	
Connector Cleaning Tips - Double-ended				
CCTP-25-0900MZ	For exposed 2.5 mm, 2.0 mm, 1.6 mm, 1.25 mm ferrules and termini (FC, SC, ST, LC, MU, etc., jumpers, male MIL T 29504/14 for MIL C 28876 and MIL T 29504/04 for MIL C38999)	Yellow	20

OPTICAL LOSS TESTING

ROGUE[®] OLTS Certifier

Test & Certify Multimode or Single-Mode Networks

ROGUE OLTS Certifier can perform multiple tests, certify a range of network types, and work both online and offline.

Specifications

- Wavelengths: Dual SM (1310, 1550 nm)
Quad (850, 1300, 1310, 1550 nm)
- Power Measurement Range: -3 to +60 dBm
- Length Measurement Range: 5 km (MM); 200 km (SM)
- Encircled Flux Compliant
- Internal Storage: 4 GB (>1000 fibers)
- Size: 23.5 x 13.3 x 7.6 cm
- Weight: 1.56 kg (3.46lb)
- Battery Life: >8 hours continuous testing
- Display: 7" high resolution color screen

ROGUE OLTS Certifier was designed for both enterprise network operators and telecom service providers who need to test and verify their networks. Its unique design features a test port on each of the paired units that measures insertion loss, return loss and length bi-directionally on multimode or single-mode networks. The additional dedicated power meter and visual fault identifier help with troubleshooting.

ROGUE is available with dual bi-directional test ports that certify two single-mode fibers at once, without swapping test cords, to accelerate testing high density networks such as data centers, saving technicians valuable time when testing hundreds or even thousands of fibers.

ROGUE OLTS Certifier is another product from AFL that focuses on being robust, easy-to-use and affordable.

Encircled Flux (EF) Reference Grade Test Cords

Encircled Flux (EF) requirements (IEC 61280-1-4 and TIA-568-14-B) specify multimode launch conditions at the end of an EF qualified Reference Grade Test Cord (RGTC). Thus, compliance to EF standards requires both, a light source with EF compliant optics and a RGTC. AFL offers RGTCs with a range of connector options. RGTCs are qualified in one direction and marked accordingly (input/output). AFL Reference Grade Test Cords use 50 µm OM4 fiber, red jacketing, and come in 2-meter length. Red jacketing used to distinguish RGTCs from standard multimode fiber jumpers.

Multi-Fiber Switch Models

AFL's Multi-Fiber Switch enables the testing of 12-fiber cables without the need to use a breakout cable. The switch allows you to utilize a single piece of test equipment to seamlessly cycle through all of the fibers in a connector regardless of polarity without having to disconnect and reconnect your test equipment. Multi-Fiber Switch is compatible with your OLTS Certification equipment.

Model	Fiber Type	Wavelength Range	Insertion Loss	Optical Return Loss (ORL)	Power
MFS-12-SM	Single-mode	1270 – 1670 nm	2.8 dB typ.; 3.3 dB max.	50 dB min	Li-Ion, USB
MFS-12-MM	OM4 multimode	800 – 1320 nm	1.8 dB typ.; 2.3 dB max.	Not specified	Li-Ion, USB

AFL NO.	Description	
MFS-12-SM-ASC-FR	Multi-Fiber Switch, 12 fibers SM, APC-SC, MPO Fiber Ring (pinned or non-pinned), soft case	
MFS-12-SM-ASC	Multi-Fiber Switch, 12 fibers SM, APC-SC, soft case	
MFS-12-SM-USC	Multi-Fiber Switch, 12 fibers SM, UPC-SC, soft case	
MFS-12-MM-USC	Multi-Fiber Switch, 12 fibers MM, UPC-SC, soft case	

FlowScout PON Power Meter

The Easiest Way to Verify Many Types of PON Networks

Eliminate the guesswork in activating and troubleshooting many types of PON Network

Specifications

- Network Types: BPON, EPON, GPON, 10G-EPON, XG-PON, XGS-PON
- Upstream: 1310, 1270 nm
- Downstream: 1490, 1550, 1577 nm
- Battery: >8 hours, rechargeable
- Weight: 0.59 kg (1.3 lb)
- Size: 17.1 x 10.4 x 4.6 cm (6.75 x 4.1 x 1.8 in)

AFL's FlowScout PON Power Meter identifies, measures, and qualifies both downstream and upstream signal levels in FTTx PON networks. It is perfect for technicians responsible for activating and maintaining networks carrying a mix of GPON/EPON, video, and next gen PON (XG/XGS-PON, 10GEPON) wavelengths.

Unlike competing through-mode PON Power Meters, AFL's FlowScout requires no setup. Technicians simply plug in the fiber under test to see results displayed in seconds on the large color touchscreen. Storage and reporting options are included to verify and document results from the field.

FlowScout's rugged design makes it perfect for outside plant environments where it can be dropped, get dirty or even wet. And because it is so easy to use, FlowScout requires little, if any, training.

Contact your AFL representative to schedule a demo or get more information.

January 17, 2022

NEW

FlowScout PON Optical Power Meter

Designed for all: FlowScout PON power meter is designed to meet the demands of the outside plant environment. It easily withstand the one-meter drop test and has splash resistant controls that are easy to use, even with gloves on.

Flexible and efficient: A range of field-swappable output adapters enables access for cleaning optical ports and supports multiple connector styles. The efficient design provides long test time from rechargeable Li-Polymer battery. Equipped with auto-off feature to save power.

Stores test results: The File Management system allows technicians to organize test results into multiple files and transfer stored results via USB to a PC for analyzing, generating reports, and printing. QR code feature can easily collect and transfer test data via any smart devices. Fully N.I.S.T. traceable.

Encircled Flux (EF) Compliant Test Kit and Light Source

Since adoption by the IEC, Encircled Flux (EF) multimode launch requirements are increasingly specified into fiber loss testing job requirements. Meeting EF specification requires technicians use EF qualified test sets. It is important to note IEC 61280-1-4 and TIA-568-14-B, specify EF multimode launch conditions at the end of an EF qualified Reference Grade Test Cord (RGTC) – not directly out source test port. EF compliance requires an EF source and RGTC used together.

AFL EF compliant loss test kit

Multimode Test Port: Light Source with designed in Encircled Flux (EF) optics paired with one EF qualified RGTC; 50/125 μm receive test cord

Single-mode Test Port: Light Source with two 9/125 μm test cords (launch/receive)

AFL NO.	Power Meter	Light Source	WL - λ (nm)	Dynamic Range (dB)	Available Connectors		Included 2-meter Test Cords	
					Source Port	Test Cord	Launch (μm)	Receive (μm)
SMLP5-5-EF-XX-YY	OPM5-2D	OLS4-EF	850, 1300 1310, 1550	40 @850/1300 nm 60 @1310/1550 nm	FC, SC	FC, SC, ST, LC	MM: RGTC, 50/125 SM: 9/125	MM: 50/125 SM: 9/125

When placing an order, select options as follows:

SMLP5-5-EF — **XX** — **YY**

Source port UCI adapter style (XX)

Input connector of RGTC (XX)

XX = FC, SC

Output connector of RGTC (YY) *

YY = FC, SC, ST, LC

* See section "Encircled Flux (EF) Reference Grade Test Cords" (below) to order additional Reference Grade Test Cords.

AFL EF compliant light source

Afl offers OLS4 light source with designed in Encircled Flux (EF) optics supplied with EF qualified RGTC.

Specify RGTC connectors at time of order. OLS4 EF is supplied with one multimode RGTC and one standard 9/125 μm single-mode test cord.

AFL NO.	Wavelengths	Test Cords Included
OLS4-EF-XX-YY	MM 850/1300 nm SM 1310/1550 nm	(1) RGTC, 50 μm, MM, 2-meter (1) 9/125 μm, SM, 2-meter

When placing an order, select options as follows:

OLS4-EF — **XX** — **YY**

Source port UCI adapter style (XX)

Input connector of RGTC (XX)

XX = FC, SC

Output connector of RGTC (YY) *

YY = FC, SC, ST, LC

* See section "Encircled Flux (EF) Reference Grade Test Cords" (below) to order additional Reference Grade Test Cords.

Encircled Flux (EF) Reference Grade Test Cords

Encircled Flux (EF) requirements (IEC 61280-1-4 and TIA-568-14-B) specify multimode launch conditions at the end of an EF qualified Reference Grade Test Cord (RGTC). Thus, compliance to EF standards requires both, a light source with EF compliant optics and a RGTC. AFL offers RGTCs with a range of connector options. RGTCs are qualified in one direction and marked accordingly (input/output). AFL Reference Grade Test Cords use 50 μm OM4 fiber, red jacketing, and come in 2-meter length. Red jacketing used to distinguish RGTCs from standard multimode fiber jumpers.

OFI-BIPMe Optical Fiber Identifier

Verify before disconnect! Avoid costly network disruption!

AFL's OFI-BIPMe is an easy-to-use hand-held device that determines if a fiber is live, the transmission direction, carrying up to four tones, and the relative core power. Its best-in-breed sensitivity makes it the only OFI that works on bend insensitive fiber and in a bright sunlight.

A favorite of technicians in the field, OFI-BIPMe has a universal head which means there are no adapters to change or lose. The slim front profile makes checking tightly packed fibers easier and the positive-stop trigger ensures the perfect amount of pressure is applied every time.

The OFI-BIPMe is nicknamed the "job saver" because it eliminates the possibility of unplugging a live fiber and interrupting service to customers which could cause expensive network outages. And its ergonomic design has been described as stunning.

Specifications

- Insertion Loss: 0.2 dB @1310 nm
- Detection Sensitivity: -64 dBm @1310 nm, 250 μ m fiber
- Detect up to four tones: 270Hz, 330Hz, 1KHz, and 2KHz
- Power Measurement: +10 to -73 dBm @1550 nm, 250 μ m fiber
- Power Supply: 2 x AA batteries; 1.2 to 1.5 V DC
- Battery Life: 8 hours
- Dimensions (W x H x D): 5.0 x 11.5 x 21.2 cm (1.9 x 4.5 x 8.3 in)
- Weight: 230 g (8.1 oz) including battery

OFI-BIPM

NEW

OFI-BIPMe

OFI-BIPM & OFI-BIPMe Optical Fiber Identifiers

Only available to customers in North America, Central America and the Caribbean, China, Vietnam, and Malaysia!

The OFI-BIPM/-BIPMe optical fiber identifier is an easy-to-use tool that determines if a fiber is live, the transmission direction, and the relative core power on standard and bend-insensitive single-mode and multimode fibers. Its positive-stop trigger mechanism provides the right amount of pressure every time to assure proper detection, while keeping loss to a minimum. This ensures that traffic will not be interrupted and the fiber will not be damaged.

Our full featured OFI-BIPM/-BIPMe includes a touch screen, an integrated optical power meter, and several easy-to-select options. The OFI-BIPM/-BIPMe includes carry case, batteries, and user's guide.

Model	Fiber Type	Wavelength Range	Power	Detectable Signals
OFI-BIPM	MM fiber, 0.25 mm SM and SM ribbon fiber (up to 12 ribbon) 1.1 /1.5 /1.7 /2.0 /3.0 mm SM jacketed fiber	900-1700 nm	(2) AA	CW, Traffic or 270 Hz / 1 kHz / 2 kHz
OFI-BIPMe	MM fiber, 0.25 mm SM and SM ribbon fiber (up to 12 ribbon) 1.1 /1.5 /1.7 /2.0 /3.0 mm SM jacketed fiber	900-1700 nm	(2) AA	CW, Traffic or 270 Hz / 330 Hz / 1 kHz / 2kHz

VFI4

Compact Long-Range Red Laser Visual Fault Identifier

Visualize defects in your single-mode and multimode fiber optic cables with the press of a button!

Specifications

- Emitter Type: Laser, Class IIIa FDA 21 CFR 1040.10 and 1040.11, Class 3R IEC, 60825-1:2014
- Wavelength: 650 nm \pm 15 nm
- Output Power: 5 mW Maximum
- Modulation: 2 Hz or CW selected
- Power 1 AA battery, <30 hours (flash mode)
- Size (H x W x D) 7.9 x 4.7 x 2.2 cm (3.1 x 1.8 x 0.8 in)
- Weight 43 g (1.5 oz)

Visual Fault Identifiers (VFIs), or Visual Fault Locators (VFLs), are used to inject visible light energy into a fiber. AFL's compact VFI4 injects high-powered red-laser light to provide exceptional brightness and range for locating sharp bends, breaks, faulty connectors, and other faults.

The VFI4 is about the size of an automotive key-fob and packs a powerful Class 3R red laser with a 10 km range. It is powered by one universally available AA battery which will last for more than 30 hours in flashing mode.

The VFI4 features a 2.5 mm universal adapter that accepts PC and angled FC, SC, ST, etc. connectors. There is an option for 1.25 mm universal adapter for LC and MU connectors.

Built with the quality you expect from AFL, a leading global supplier of passive fiber optic components for over 30 years, the VFI4 can easily handle the rigors of the field test environment.

Contact your local AFL representative to learn more about the VFI4 and other essential tools for installing, activating and maintaining fiber optic networks.

Contact sales@AFLglobal.com

NEW

VFI4

VFI4 Visual Fault Identifier

AFL's compact VFI4 injects high-powered red-laser light to provide exceptional brightness and range for locating defects in single-mode and multimode fibers. During installation and activation, the VFI4 is used for quick continuity checks, fiber tracing, splice verification, and Pass/Fail validation for mechanical connectors. The VFI4 is also an essential troubleshooting tool to find sharp bends, breaks, faulty connectors, and other defects that "leak" light - enabling technicians to quickly spot them. The rugged VFI4 is designed for the rigors of real-life field testing. It has a range of up to 10 km, fits on a keychain, and features extensions that protect the red-laser port. It has both CW and pulsating modes and is powered by a single AA battery for up to 30 hours of operation.

Model	Wavelength	Output Power (into single-mode fiber)	Emitter Type*	Connector Type	Power
VFI4	650 nm	<5 mW, 2 Hz, CW	Laser	Universal 2.5 mm; 1.25 mm	1 x AA

* Safety: Class IIIa FDA 21 CFR 1040.10 and 1040.11, Class 3R IEC 60825-1:2007-03.

AFL NO.	Description
VFI4-01-0900PR	VFI4 with 2.5 mm and 1.25 mm adapters

VFI4 Accessories

The VFI4 uses one-piece thread-on adapters with a captivated alignment sleeve. For replacements, use part numbers 2900-50-0013MR and 2900-50-0012MR.

AFL NO.	Description
2900-50-0013MR	2.5 mm Universal adapter for VFI port
2900-50-0012MR	1.25 mm Universal adapter for VFI port

MT Tracer Kit

MT Tracer (12-fiber VFI and Display)

The MT Tracer kit includes an MT Tracer Source, MT Tracer Display, and carry case. The MT Tracer Source, which may be used as a multifiber Visual Fault Identifiers provides 12 separately controlled visible lasers. The MT Tracer Display uses passive optics to show the light received on each fiber being traced. The MT Tracer can illuminate a selected fiber or automatically sequence through all 12 fibers. When used together, the MT Tracer Source and Display provide a fast way to trace (verify connectivity) a 12-fiber link. Both Source and Display are equipped with male (pinned) 12-fiber MTP® connectors.

Model	Wavelength	Output Power (into SMF)	Emitter Type*	Connector Type	Power
MT Tracer Source	650 nm	1 mW, 2 Hz or CW	Laser	MTP®	2 AA (40 hours)

* Safety: Class II FDA 21 CFR 1040.10 and 1040.11, IEC 60825-1:2007-03.

TRCR-10-0900	MT Tracer Display	Provides eye-safe viewing of visible light

TEST MANAGEMENT AND REPORTING SOFTWARE

aeRos® Cloud-based Test Management and Reporting

aeRos is the cloud-based solution that integrates every aspect of your testing process. aeRos lets you set up jobs before a truck ever rolls, monitor data and interact with technicians in real time, complete jobs faster, generate reports more efficiently, and get to revenue sooner.

- Seamless interaction with Android™ applications — push jobs and equipment setup down to tech in the field – no more mistakes and get test results real-time — from anywhere in the world
- Run reports at the push of a button — within seconds of completing the job users can run a report even before the technician leaves the job site
- Licensing — flexible licensing supports individual users to full enterprise solution

aeRos Software Licensing

aeRos solution is available in two options: aeRos BASIC account and aeRos PRO account.

aeRos® BASIC account — Data Management solution that allows users to save their test data in the aeRos Cloud and then retrieve it from anywhere at any time with a standard Internet browser. **aeRos BASIC is free to all owners of AFL's ROGUE modular test equipment.**

aeRos® PRO account — Workflow Management solution that allows users to manage their entire testing workflow and enables seamless and efficient communications and data management. aeRos PRO is available in annual and lifetime License configurations.

AFL NO.	Description
aeRos-PRO-YRL	(1) Admin or Project Manager Seat plus (10) user seats, 1 year subscription
aeRos-PRO-LFT	(1) Admin or Project Manager Seat plus (10) user seats, Lifetime subscription

TRM® 2.0/3.0 Test Results Manager

TRM Test Results Manager, a PC-based software, provides comprehensive test results (OTDR trace, connector inspection, optical loss) test results analysis and reporting. Designed for use with AFL test and inspection products, TRM is available in Basic and Advanced versions. TRM Basic allows technicians to quickly view test results, analyze OTDR traces, view loss or certification results, batch-edit OTDR traces and create acceptance reports conforming to industry guidelines. Reports can be generated showing dual wavelength traces and event tables, end-face image, event map and loss data for each fiber. Users can apply pass/fail thresholds to OTDR events and OLTS measurement; create and apply application rules per industry standards. The OTDR Batch editor allows user to edit and analyze multiple trace files simultaneously. TRM Advanced software includes all Basic software features and adds bi-directional OTDR trace averaging, macrobend detection, and export of .SOR files to .CSV file format. Users may download a TRM full working version (Basic plus Advanced features) and try it for 30 days. Once the evaluation period ends, users will need to acquire TRM Basic or TRM Advanced software to continue to use TRM Test Results Manager.

ADAPTER CAPS & ACCESSORIES

Adapter Caps for OPM Ports and OFS300-200

AFL's standard thread-on adapter caps are used to mate non-angled and angled single-fiber and dual-fiber connectors to optical power meter ports on OPM/CSM series power meters and inspection ports on OFS300-200C microscopes.

AFL NO.	Description
8800-00-0214	2.5 mm Universal (accepts FC, SC, and ST ferrules)
8800-00-0224	1.25 mm Universal (accepts LC and MU ferrules)
8800-00-0200	FC
8800-00-0209	SC
8800-00-0202	ST®
8800-00-0225	LC simplex only
8800-00-0273PR	LC duplex only ^a
8800-00-0221	E2000
8800-00-0203	SMA

Notes:

- a. When it is used on OPM, it's recommended for single-mode testing only. The loss measured with this adapter can be up to 1 dB.
- b. For inspecting backplane and duplex connectors with 1.25 mm ferrules such as LC and MU. Not recommended for measuring optical power.

Adapter Caps for OFS300-200 Only

AFL's thread-on angled and multifiber adapter caps are used to mate angled single-fiber as well as angled or non-angled multifiber connectors to our OFS 300-200C microscopes.

Note: Do not use the following adapter caps with our optical power meters or other test sets to measure optical power!

AFL NO.	Description
8800-00-0220	Angled SC
8800-00-0218	Angled FC
8800-00-0233	MTP®/MPO flat ferrule (0°), typically MM
8800-00-0234	MTP®/MPO angled ferrule (8°), typically SM
8800-00-0236	1.25 mm open Universal ^b
8800-00-0219	2.5 mm open Universal.(accepts SC duplex, OptiTap)
8800-00-0244	1.6 mm ferrule (pin)
8800-00-0248	2.0 mm ferrule (pin)
8800-00-0226	MU simplex
8800-00-0219	2.5 mm open Universal.(accepts SC duplex, OptiTap)
8800-00-0230	MT-RJ (A side only)
8800-00-0231	MT-RJ (A side or B side)

Accessories for Discontinued Products

AFL NO.	Description	Model
C850 OTDR, C840 and C880 Accessories and Connector Adapters		
4050-00-0122PR	Vehicle charger/supply, 18 V, 6.7 A, 120 W	
4050-00-0918PR	AC charger 100-240 VAC to 18 VDC (a)	
3900-05-0004ME	C850 Li-Ion battery	
4050-30-0005MR	C850 Li-Ion battery charger 90-260 VAC (b)	
3900-05-0001PE	C840, C880 Li-Ion battery	
6000-00-0027MR	Cable, USB-MINI B (connect to PC)	
TRM-00-0920PR	TRM® 2.0 software upgrade, Basic to Advanced	
8800-00-0072PR	Universal flip-top dust cap for UCI outputs	
2900-50-0002MR	FC adapter for OTDR/OLS port	C850, C840, C880
2900-50-0003MR	SC adapter for OTDR/OLS port	
2900-50-0004MR	ST adapter for OTDR/OLS port	
2900-50-0006MR	LC adapter for OTDR/OLS port	
8800-00-0200	FC adapter for OPM port	C850
8800-00-0209	SC adapter for OPM port	
8800-00-0202	ST® adapter for OPM port	
8800-00-0225	LC adapter for OPM port	
8800-00-0214	2.5 mm adapter for OPM port	
8800-00-0224	1.25 mm adapter for OPM port	
2900-53-0001MR	2.5 mm adapter for VFL port	
2900-53-0002MR	1.25 mm adapter for VFL port	
2900-52-0001MR	FC adapter for OPM port	
2900-52-0002MR	SC adapter for OPM port	
2900-52-0003MR	ST adapter for OPM port	C840, C880
2900-52-0004MR	LC adapter for OPM port	
2900-52-0005MR	2.5 mm Universal adapter for OPM port	
2900-52-0006MR	1.25 mm Universal for OPM port	
2900-50-0007MR	2.5 mm Universal adapter for VFL port	
2900-50-0010MR	1.25 mm Universal adapter for VFL port	
CS260, FLX380, OFL250, OFL280 Series Accessories and Connector Adapters		
6000-00-0024MR	Cable, USB-MINI B (connect to PC)	
4050-00-0927PR	AC charger 100-240 VAC to 15 VDC (a)	
4050-30-0005MR	Li-Ion battery charger 90-260 VAC (b)	
3900-05-0003ME	Li-Ion battery pack	
1400-01-0123PZ	Soft carry case	
TRM-00-0920PR	TRM® 2.0 upgrade from Basic to Advanced	
2900-50-0002MR	FC adapter for OTDR/OLS port	
2900-50-0003MR	SC adapter for OTDR/OLS port	
2900-50-0004MR	ST adapter for OTDR/OLS port	
2900-50-0006MR	LC adapter for OTDR/OLS port	
2900-50-0011MR	SC/APC adapter for OTDR/OLS port	
2900-52-0001MR	FC adapter for OPM port	
2900-52-0002MR	SC adapter for OPM port	
2900-52-0003MR	ST adapter for OPM port	
2900-52-0004MR	LC adapter for OPM port	
2900-52-0005MR	2.5 mm Universal adapter for OPM port	

AFL NO.	Description	Model
2900-52-0006MR	1.25 mm Universal adapter for OPM port	
2900-53-0001MR	2.5 mm Universal adapter for VFL port	
2900-53-0002MR	1.25 mm Universal adapter for VFL port	
8800-00-0072PR	Universal flip-top dust cap for UCI outputs	
M210e/M310/M700/M710 OTDR Accessories and Connector Adapters		
4050-00-0918PR	AC charger ^a , 100-240 VAC to 18 VDC	M210e, M310, M700, M710
4050-00-0122PR	Vehicle charger, 18 V, 6.7 A, 120 W	
8800-00-0072PR	Flip-top dust cap for UCI outputs	
TRM-00-0920PR	TRM 2.0 upgrade to Advanced software	
8800-00-0072PR	Flip-top dust cap for UCI outputs	
1400-01-0075PZ	Hard carry case	M210e, M310
3900-05-0001PE	Li-Ion battery	
6000-00-0024MR	Cable, USB-MINI B (connect to PC)	
1400-01-0067	Soft Case	
1400-01-0082PZ	Soft carry case	M700, M710
3900-05-0004ME	Li-Ion battery	
4050-30-0005MR	Li-Ion battery charger 90-260 VAC (a)	
6000-00-0027MR	Cable, USB-MINI B (connect to PC)	
2900-50-0002MR	FC adapter for OTDR port	M210e, M310, M700, M710
2900-50-0003MR	SC adapter for OTDR port	
2900-50-0004MR	ST adapter for OTDR port	
2900-50-0006MR	LC adapter for OTDR port	
2900-50-0011MR	SC/APC adapter for OTDR port	M710
2900-52-0001MR	FC adapter for OPM port	M210e, M310
2900-52-0002MR	SC adapter for OPM port	
2900-52-0003MR	ST adapter for OPM port	
2900-52-0004MR	LC adapter for OPM port	
2900-52-0005MR	2.5 mm Universal for OPM port	
2900-52-0006MR	1.25 mm Universal for OPM port	
2900-50-0007MR	2.5 mm Universal for VFL port	
2900-50-0010MR	1.25 mm Universal for VFL port	
8800-00-0200	FC adapter for OPM port	M700, M710
8800-00-0209	SC adapter for OPM port	
8800-00-0202	ST adapter for OPM port	
8800-00-0225	LC adapter for OPM port	
8800-00-0214	2.5 mm Universal for OPM port	
8800-00-0224	1.25 mm Universal or OPM port	
2900-53-0001MR	2.5 mm Universal adapter for VFL port	
2900-53-0002MR	1.25 mm Universal adapter for VFL port

Accessories for Discontinued Products

AFL NO.	Description	Model
OFS300 Microscope Accessories and Adapter Caps		
1400-01-0055	Soft Carry case	
1400-01-0025PZ	Holster	
2900-10-0001	Tripod Stand (table top)	
8800-00-0214	2.5 mm Universal (accepts FC, SC, and ST ferrules)	
8800-00-0224	1.25 mm Universal (accepts LC and MU ferrules)	
8800-00-0200	FC	
8800-00-0209	SC	
8800-00-0202	ST [®]	
8800-00-0225	LC simplex only	
8800-00-0273PR	LC duplex only ^b	
8800-00-0221	E2000	
8800-00-0226	MU simplex	
8800-00-0219	2.5 mm open Universal ^c (accepts SC duplex, OptiTap)	
8800-00-0230	MT-RJ (A side only)	
8800-00-0231	MT-RJ (A side or B side)	
8800-00-0203	SMA	
8800-00-0211	DIN 47256	
8800-00-0220	Angled SC	
8800-00-0218	Angled FC	
8800-00-0234	MTP [®] /MPO angled ferrule (8°), typically SM	
8800-00-0233	MTP [®] /MPO flat ferrule (0°), typically MM	
8800-00-0236	1.25 mm open Universal	
8800-00-0219	2.5 mm open Universal (accepts SC duplex, OptiTap)	
8800-00-0244	1.6 mm ferrule (pin)	
8800-00-0248	2.0 mm ferrule (pin)	
8800-00-0223	1.0 mm bare fiber (plastic)	
SVA1 Accessories and Connector Adapters		
2900-50-0002MR	FC adapter	
2900-50-0003MR	SC adapter	
2900-50-0004MR	ST adapter	
2900-50-0006MR	LC adapter	
8800-00-0072PR	Universal flip-top dust cap for UCI outputs	

Notes:

- a. Specify power cord, see [page 61](#), Table 1.
- b. When it is used on OPM, it's recommended for single-mode testing only. The loss measured with this adapter can be up to 1 dB.
- c. Specify power cord, see [page 61](#), Table 2.

CALIBRATION SERVICES

Servicing your valuable AFL Test & Inspection Equipment at authorized AFL calibration facilities ensures you are getting the most out of your equipment and it is performing accurately. In keeping with ISO certification guidelines, AFL recommends the following calibration intervals for AFL Test & Inspection Equipment products:

- 3-year Calibration Interval for OPM, CSM1, OLS, CSS1, and OFI products
- 1-year Calibration Interval for all other AFL Test & Inspection Equipment products

Authorized AFL calibration facilities are traceable to the National Institute of Standards and Technology or equivalent.

Category	Model	
OTDRs, FlexTesters	C850*	
	FlexScan® TS100, FS300, FS200-50B/-60/-300/-100/-304 without OLS/OPM	
	FlexScan TS100, FS300, FS200-50/-60/-300/-100/-304 with OLS/OPM

ROGUE® OLTS Certifier Kits (Pairs)	RGK-CERTxx, RGK-CERTxxB1	
ROGUE OLTS Certifier Modules	RG-1100-xxx	
FlowScout PON Power Meter	TPPM-XG	
Power Meters	CSM1, OPM, MFP	
Light Sources	CSS1, OLS (except OLS1-2C* and OLS1-1C*), MFT	
Light Sources - Encircled Flux (EF) Compliant	OLS1-DL-EF, OLS4-EF	
Optical Fiber Identifiers	OFI, MFI	

Notes:

- *This product is supported for calibration service only. Repair service is no longer supported on this product due of the lack of availability of the components needed to make repairs. This product must be in fully functional condition in order to be calibrated. Any of these products that are sent in for calibration that are not in good working condition will be charged an evaluation fee and sent back to the customer without calibration.
- The following products are no longer supported for repair or calibration:
 - OTDRs: CS260, FLX380-1xx, M100, M200, M600, M650, M700, OFL100, OFL200,
 - Inspection products VFS1, VFS2, DFD1, VFD2
 - Fiber Identification: OFI-FTTx, HiLite/VFI3, VFI2
 - Optical Light Sources (OLS): OLTS2, OLTS3, OLT4, OLTS5, OLS6, OLS3
 - Optical Power Meters (OPM): OPM3, OPM4-FTTx, OPM6
 - Optical Loss Testing: Turbo 500, T400, ORL3, ORL3B, T50B
 - Miscellaneous: FTS, FTS1, FTS3, VOA4, VOA5, VOA6, VOA-SM, WSP, TACT1

Calibration and Repair Facilities

AFL has an authorized calibration/repair facility for AFL products in the USA, Europe and Asia Pacific. Please contact customer service for a return authorization number prior to sending your AFL test equipment in for repair or calibration.

Fujikura Europe LTD is an Authorized European Repair and Calibration facility for AFL Test and Inspection products and should be contacted directly for service.

Fujikura Asia LTD is an Authorized Asia Pacific Calibration facility for AFL Test and Inspection products and should be contacted directly for product calibrations.

Extended Warranty Options

Standard Warranty

- CSM1, CSS1, OPM, OLS, OFI-200, OFI-400 products are warranted against defective material and workmanship for a period of (5)* five years from the date of delivery to the end user.
- All other AFL products are warranted against defective material and workmanship for a period of (1) one year from the date of delivery to the end user.
- Any product that is found defective within the warranty period will, at the discretion of AFL, be repaired or replaced. Warranty will be voided if the product has been repaired or altered by other than an authorized AFL product repair facility, if the void sticker has been compromised, or which have been subject to misuse, negligence, or accident. In no case shall AFL liabilities exceed the original purchase price.

* **Note:** Wear items such as OFI plungers are warranted for a period of (1) one year.

Extended Warranties for Products Offered with One Year Warranty

	1 - Year Extended Warranty	2 - Year Extended Warranty	4 - Year Extended Warranty
	Part Number	Part Number	Part Number
	EW1Y-00-0907	EW2Y-00-0907	EW4Y-00-0907
	EW1Y-00-0906	EW2Y-00-0906	EW4Y-00-0906
	EW1Y-00-0905	EW2Y-00-0905	EW4Y-00-0905
	EW1Y-00-0904	EW2Y-00-0904	EW4Y-00-0904
	EW1Y-00-0903	EW2Y-00-0903	EW4Y-00-0903
	EW1Y-00-0902	EW2Y-00-0902	EW4Y-00-0902
	EW1Y-00-0901	EW2Y-00-0901	EW4Y-00-0901

Extended warranties add to standard warranty providing complete warranty time period

Example: 1 year standard + 4 years extended = 5 years warranty coverage

TERMS AND CONDITIONS

1. **PRICES:** All prices set forth are suggested selling prices, FOB Duncan, SC for domestic shipments and FCA Duncan, SC for international shipments. All prices and specifications are subject to change without notice. Contact our Sales Department to confirm price and delivery.
2. **ORDER ENTRY:** Minimum order \$250.00.
3. **TERMS OF PAYMENT:** Terms of payment shall be net within thirty (30) days from date of invoice with approved credit.
4. **SHIPMENTS:** When a carrier is not specified, shipment will be made by the best surface-carrier available. RUSH ORDERS will be shipped as authorized. The customer shall bear the risk of in-transit loss or damage.
5. **CANCELLATION:** Unless otherwise agreed, in the event of cancellation, AFL shall be reimbursed for all expenses incurred.
6. **PACKING:** All instruments shall be packed for shipment in accordance with standard commercial practices for protection during shipment and storage.
7. **WARRANTY:**
 - OPM, OLS, OFI-200, OFI-400 products are warranted against defective material and workmanship for a period of (5)* five years from the date of delivery to the end user.
 - All other AFL products are warranted against defective material and workmanship for a period of (1) one year from the date of delivery to the end user.
 - Any product that is found defective within the warranty period will, at the discretion of AFL, be repaired or replaced. Warranty will be voided if the product has been repaired or altered by other than an authorized AFL product repair facility, if the void sticker has been compromised, or which have been subject to misuse, negligence, or accident. In no case shall AFL liabilities exceed the original purchase price.
 - * **Note: Wear items such as OFI plungers are warrantied for a period of (1) one year.**
8. **RETURN:** A Return Materials Authorization (RMA) number must be issued to the customer prior to accepting any products for return. Credit will be issued only on current merchandise, in re-saleable condition. Obsolete or discontinued products may not be returned for credit. Any material returned after 30 days of the original invoice date will be subject to a 20% restocking fee. No materials may be returned beyond 6 months from the original invoice date.
9. **REPAIR/CALIBRATION:** All calibration and repair orders are accepted by phone and need to be confirmed by purchase order. When shipping equipment for repair/calibration please include the service request number issued by Customer Service/Technical Support, a complete description of the fault condition, all connector adapters and dust caps to protect the connectors and contact information in case additional information is required. All chemicals should be removed from equipment case before sending in for repair or calibration. Minimum repair evaluation fee \$150.

Some older AFL products are no longer supported or supported for calibration services only. Products supported for calibration services only must be in fully functional condition to be calibrated. Any of these products that are sent in for calibration that are not in good working condition will be charged an evaluation fee and sent back to the customer without calibration.

Upon completion of the service requested, prompt payment is expected. Completed service requests not paid within 60 days of request will be charged an additional storage fee of \$45 per month for each month or portion thereof that payment has not been received.
